

FleetLine Community Project 2011

What is our community project all about?

FleetLine are the small fleet division of LeasePlan UK. With 35 staff members working from our office in Caldecotte, Milton Keynes, we provide company car leasing for business fleets of up to 100 vehicles and personal vehicle leases for individuals.

Every year LeasePlan support community schemes throughout the UK whereby employees can take a day off work in order to support a local community project. For 2011 we are delighted to be supporting Milton Keynes Hospital in building a new play area for their children's ward.

Overview

Milton Keynes Hospital NHS Foundation Trust is a medium size hospital serving the people living in Milton Keynes and the surrounding areas.

The hospital has approximately 500 inpatient beds and provides a broad range of general medical and surgical services, including A&E, for over 300,000 people every year. We continue to develop our facilities to meet the needs of a growing population.

In addition to providing general acute services Milton Keynes Hospital increasingly provides more specialist services, including cancer, cardiology and oral surgery and has the responsibility for treating premature babies born locally and in the surrounding areas. Some of the babies we treat are born as early as 24 weeks old (16 weeks early) and weighing as little as 500 grams.

The Project:

The children's ward at Milton Keynes Hospital currently has a small outside space available for children to play. This area is in need of development in order to provide a fun and safe environment for the children to play.

FleetLine plan to create a new sensory and explorative garden for children aged 2-10 years old where they can have fun outside while visiting family or recovering from their treatment.

As you will see from the pictures, the garden is in need of a complete overhaul – Amongst other things, the paving slabs need to be lifted, ground levelled, the walled area dug out and re-planted. Bark needs to be laid to create a play area and the existing sheds need repairing.

With work due to begin in May 2011, the FleetLine team have really got behind this project undertaking a number of events to raise the much needed investment required to complete the project but we are keen to hear from anyone that may be able to help further.

We really want to create a garden where the children can enjoy themselves in a safe, fun environment.

How to get involved

Alongside the various fund-raising activities being undertaken we are keen to hear from anyone that may be able to help us complete this worthwhile and essential project. Whether you can help by donating money or supplies we really would appreciate your assistance.

Could you help? Do you know anyone else who could help?
